

Urgent repair & maintenance

Lewis & Raby offers in-house and on-site repair, alteration, refurbishment and maintenance services for your equipment and machinery.

Our CNC machining capacity and wide range of engineering services including fabrication and ASME IX welding means no repair or alteration is too large or too small.

We offer a quick turnaround service for urgent and emergency repairs, reducing the loss of your company's valuable production time due to part failure or machinery breakdown.

Our experienced engineers can advise on alterations to improve parts so they are more effective or durable for the future.

Lewis & Raby also offers refurbishment and routine maintenance work for metal parts, equipment and machinery.

In our assembly shop, we service and test your equipment or machinery to ensure that it is in full working order.

We have facilities for pressure testing, water testing, and Faro Arm inspections.

Contact our engineering team to discuss your repair or alteration in more detail. Email enquiries@lewisandraby.co.uk or call 0151 546 2882 today.
