

# Welding

Welding is one of our primary fabrication services. Our skilled workforce is able to offer MMA, MIG, and TIG coded welding to the ASME IX standard.

Our range of welding skills means we can perform high or low speed welding depending on the thickness of the material being welded and the quality of the welding required.

We work with a wide variety of metals including mild steel, stainless steel, duplex and super duplex. We also offer brazing and aluminium welding services.

Contact our experienced engineering team on 0151 546 2882 or at [enquiries@lewisandraby.co.uk](mailto:enquiries@lewisandraby.co.uk) for further details or to discuss your specific welding requirements.

## Guide to welding services

MMA	Manual Metal Arc (Shielded metal arc welding SMAW or stick welding)	Versatile for shop jobs and on-site work
MIG	Metal Inert Gas (Gas Metal Arc Welding – GMAW)	Semi-automatic or automatic process for higher welding speed
TIG	Tungsten Inert Gas (Gas Tungsten Arc Welding – GTAW)	Manual welding process for welding thin materials and high quality welding.
