

Industrial Rollers

Lewis & Raby is a manufacturer of industrial rollers for a variety of industries including printing, coating, laminating, textiles, converting, packaging, and food processing.

Here are just a few examples of the types of roller we are able to manufacture:

- Converting Industry Rollers
- Conveyor Rollers
- Guide Rollers
- Handling Rollers
- Heat Transfer Rollers
- Idler Rollers
- Lehr Rollers
- Nip Rollers
- Paper Mill Rollers
- Rubber Coated Rollers
- Transport Rollers

Our rollers are cut and fabricated in mild, stainless or carbon steel, or aluminium, before being fitted with shafts and bearings. Our options include single or double shell rollers as well as spiral or straight fluting.

We offer a range of finishes such as plated, plain ground, rubber coated for conveyor belts, and non-stick teflon coated for rollers in the food industry.

Repair and Maintenance

Lewis & Raby engineers are also able to provide a quick turn-around repair and maintenance service for industrial rollers.

Our engineers can machine new roller shafts, repair welding and fit new bearings. Rollers can also be crowned to improve belt tracking and re-coated if they are worn out.

Our quick turn-around service means that you can minimise production downtime where rollers are used in critical machinery and equipment.

Please contact us to discuss your specific requirements for the manufacture or repair of your industrial roller.
